To Whom it May Concern:

Upon becoming the beneficiary of timber rights in Anderson County, Kentucky, I was made aware of that the services of a Consulting Forester/ Timber Consultant were available and could be invaluable in proceeding. I was provided with a list of companies that provide this service in the Anderson County area and was fortunate to have made contact with Bluegrass Consulting Forestry, specifically Mr. W. Cary Perkins.

From the moment that first contact was made, I was impressed with Cary's knowledge and manner. As I went through the process, I constantly felt that Cary was the right choice as his responsiveness, detail oriented logic and integrity was evident throughout. He took the time and was available to answer each and every question that I had. My situation with the property being vacant and some issues with the adjoining landowner were handled professionally and honestly. Additionally, since I live over 400 miles away from the property, Cary made himself available and handled many of the details that I couldn't. He certainly went beyond what our agreement originally specified to accommodate my situation.

Another important factor is that Cary has contacts to result in a successful and fair sale of timber and the knowledge to oversee the operation of logging overall.

I highly recommend the services of Bluegrass Consulting Services and Cary Perkins to anyone contemplating their use.

I can be reached at 770-751-1229 or 678-393-9449 to further discuss any questions that may arise from the above.

Sincerely,

Daniel Bruner
President
